

Master of Fine Arts

Fine Arts

Program Objectives

The Master of Fine Arts in Art prepares students to become professional artists capable of producing work at the highest technical and conceptual level that engages with contemporary visual arts discourse.

OVERALL LEARNING OBJECTIVES EXPECTED FOR STUDENTS IN THE PROGRAM:

The ability to engage in interdisciplinary and wide-ranging experimental, creative, and intellectual exploration leading to the making of art at the highest levels

Advanced creative and theoretical foundations

The ability to trace intellectual and artistic histories, to understand the complexities of theories applied to the visual arts, and to address global art practices

Through program electives, a broad platform for experimentation and for exploring the expansive possibilities for complementary fields of research and other modes of enriching their art practice
